

SHUBH KUMAR GUPTA

Nationality: Indian

Email: shubh20001005@gmail.com

Mob No: +91-8862996687

LinkedIn: [Shubh Kumar Gupta](#)

RESEARCH INTERESTS:

1. VLSI Design and Low-Power CMOS Circuit Design
2. Semiconductor Device Fabrication
3. IC Design and Hardware Accelerators for AI

EDUCATION:

Bachelor of Technology in Electrical & Electronics Engineering

Jun.'21 – Jun.'24

Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal, India (NIRF:289th)

CGPA: 7.44

Relevant coursework: Electrical Machine, Digital Electronics, Analogue Electronics, Control System, Semiconductor Devices, Control System.

Diploma in Electrical Engineering

Aug.'17 – Aug.'20

State Board of Technical Education, Ranchi, India

CGPA: 7.87

Relevant coursework: Network Theory, Power System, Microprocessors, Circuit Theory, Power Electronics, Power Transmission and Distribution.

PROJECTS:

Automatic Star Delta Starter Using Microcontroller with Voltage Protection

Feb. – May'24

- Developed an automatic star-delta starter system for 3-phase induction motors to reduce starting current and incorporate over/under-voltage protection for enhanced motor safety.
- Designed control logic and programmed the microcontroller for automatic transition from star to delta mode; integrated voltage_sensing circuits and relays for protection mechanisms.
- Successfully implemented a reliable system that automated motor starting and safeguarded against voltage fluctuations; improved skills in embedded control, power electronics, and motor protection systems.

IOT Based Irrigation System

Oct.'23 – Jan.'24

- Designed an automated irrigation system that monitors soil moisture levels and controls water flow to optimize irrigation, conserving water and increasing agricultural efficiency.
- Developed and coded the system using microcontrollers and sensors; interfaced soil moisture sensors with NodeMCU (ESP8266) and configured wireless communication for remote monitoring.
- Created a functional prototype that reduced water usage through smart scheduling; gained hands-on experience in precision agriculture, sensor integration, and remote IoT control.

IOT Based Home Automation System

Feb. – May'23

- Developed a smart home automation system that enables control of appliances using a smartphone via Wi-Fi, enhancing convenience, energy efficiency, and remote accessibility.
- Designed and programmed the IoT system architecture; integrated sensors and relays with ESP8266 NodeMCU microcontroller; handled both hardware and software aspects.
- Successfully built a low-cost, scalable prototype that demonstrated real-time control with minimal latency; improved understanding of IoT, embedded systems, and automation workflows.

INTERNSHIPS:

IOT Engineer Trainee | ITHENA

Mar. – Sep.'23

- Assisted in developing and programming IoT-based prototypes using Arduino, ESP32, and various sensors for real-time automation projects.
- Gained practical experience in IoT communication protocols (MQTT/HTTP) and cloud platforms like Blynk and ThingSpeak for remote monitoring.

Junior Engineer Trainee | Electric Loco Shed

Oct. – Dec.'19

- Assisted in inspection, maintenance, and troubleshooting of electric locomotives (WAG-7, WAP-4, etc.), focusing on traction motors, braking systems, and auxiliary equipment.

Site Engineer Trainee | 220/132/33kV Grid Substation

Sep. – Oct.'19

- Assisted in monitoring and supervising installation, testing, and maintenance activities of power transformers, circuit breakers, isolators, and protection systems within the substation.

PROFESSIONAL EXPERIENCE:

Data Analyst

Jun.'25 – Present

Amazon Development Center | Hyderabad

- Worked on internal platforms like Compass, CRISP, and Content Tracker; utilized Excel (VLOOKUP, Pivot Tables), SQL queries, and regulatory databases for data validation and decision-making.
- Contributed to enhanced product compliance accuracy and operational efficiency; gained deep exposure to global compliance frameworks (RoHS, REACH, CPC, CE, etc.) and e-commerce regulations.

Subject Matter Expert

Sep.'21 – May'25

Teleperformance Global Business Private Limited | Kolkata

- Used Amazon's internal CRM tools, troubleshooting scripts, remote diagnostics, and knowledge management systems to deliver accurate and timely solutions; ensured adherence to SLAs and quality metrics.
- Recognized for maintaining high CSAT (Customer Satisfaction) scores and low AHT (Average Handling Time); contributed to improving first contact resolution and customer experience.

TECHNICAL SKILLS:

Programming & Tools : Arduino IDE , Keil uvision, SCADA, SQL

Microcontrollers & Platforms : NodeMCU (ESP8266), 8051 Microcontroller, ATmega328 (Arduino-based systems)

IoT Protocols (HTTP/MQTT) : Sensor Integration (Soil Moisture Sensor, Voltage Sensors, Relay Control Systems, Star-Delta Starter Logic Automation

CERTIFICATIONS:

TSE Jumpstart Operations Domain: Prompt Engineering- Amazon Learn

Oct.'25

Managing Effectively with AI- Amazon Learn

Oct.'25
